

York Catholic Mathematics

Summer Assignments

Please remember the honor code while completing your assignment. You can look up how to do these *skills*; we highly recommend that. However, looking up how to do the specific math problems on your assignment would be against the honor code. Your teacher will want you to come into the new school year feeling confident in being able to perform these math topics. Take the time to do these assignments to learn from them, and remember the purpose of this is to make sure you know the skills you need to be successful in the upcoming school year.

All the assignments listed below are for the course you enter in the 2022-2023 school year.

Incoming 7th Grade:

- [Pre-Algebra Optional Assignment](#)

Incoming 8th Grade:

- [Algebra 1 382](#)
