

## TIMELINE FOR SOPHOMORES

- This year is a great time to dive into your academics and extracurricular activities.
- You have already finished one year of high school so you know what to expect. Make the most of it. Do the things you enjoy. Challenge yourself academically.
- Participate actively in your SOAR course. Use this class to explore careers you might be interested in as an adult. Look at your areas of strength and how they are related to different careers. Prepare for the world of work by getting your resume ready. Set up a College Board account to get ready to take the PSAT and SAT.
- Meet with your school counselor to talk about your plans after York Catholic and schedule options for the second half of high school.
- Continue to explore your interests and abilities.
- Talk to and job shadow individuals in careers that interest you.
- Begin to think about college choices. Take the time to go online and look at different colleges, their admission requirements, and specific academic programs.
- Take the PSAT 10 in April and discuss your results with your parents and guidance counselor.
- Keep working hard!
